

UNITED STATES DISTRICT COURT  
WESTERN DISTRICT OF WASHINGTON  
AT SEATTLE

JOANNE K. LIPSON,

Plaintiff,

V.

## ON MARINE SERVICES CO. LLC,

Defendant.

CASE NO. C13-1747

ORDER DENYING MOTION  
FOR RECONSIDERATION

## I. INTRODUCTION

This matter comes before the court on Plaintiff's motion for reconsideration of the court's ruling (12/4/13 Order (Dkt. # 260)) excluding expert testimony based on an industry study by C. Washbourne titled "Silicosis and Asbestos Hazards Associated with the Manufacture and Use of Profax" (the "Washbourne Report"). (*See* Mot. (Dkt. # 315).) Having considered the submissions of the parties, the balance of the record, and the relevant law, the court DENIES Plaintiff's motion for reconsideration.

## 1                   **II. BACKGROUND**

2                   This is an asbestos case. Plaintiff alleges that her husband's exposure to asbestos  
3 while working at a steel mill was a substantial factor in his development of  
4 mesothelioma. (*See generally* 2d Am. Compl. (Dkt. # 302).) Defendant's products,  
5 called "hot tops," were used at the mill to insulate ingot molds into which molten steel  
6 was poured. (Mot. at 2.) One of the issues in this case is the extent to which, if any,  
7 quantities of asbestos in Defendant's hot tops survived the heating associated with  
8 steelmaking. Defendant maintains that the asbestos degraded and detoxified when  
9 exposed to the heat from the molten steel. (*Id.*) Plaintiff's expert Susan Raterman relies  
10 in part on the Washbourne Report to support her opinion that "significant quantities of  
11 asbestos" in Defendant's products survived the steelmaking process. (*See, e.g.*, Raterman  
12 Decl. (Dkt. # 166-1) ¶ 14.)

13                   The Washbourne Report states:

14                   In laboratory experiments conducted at Foseco International Ltd. it was  
15 found that 1 lb. (454 gm.) of Profax ash contained a total of 0.142 gm. of  
16 respirable matter, of which 0.058 gr. was asbestos. . . . Assuming that the  
17 asbestos particles average 30 microns in length x 1 micron in diameter, this  
means that 1 lb. of Profax can give rise to 756 million particles of asbestos.

18                   (Udo Decl. (Dkt. # 351-1) Ex. 2 at 21.) The court previously excluded expert testimony  
19 based on this report for two reasons: (1) the Washbourne Report does not provide any  
20 details about the referenced experiments, including whether the measurements were taken  
21 after the hot tops were heated and, if so, at what temperature and for how long, and (2)  
22 the products tested in the study contained crocidolite (blue asbestos), whereas  
Defendant's hot tops contained amosite (brown asbestos), and there was no "thorough

1 comparison showing substantial similarity" between the two products. (12/4/13 Order at  
2.)

3 The first trial between the parties ended in a mistrial. (*See* Dkt. # 293.) A second  
4 trial will begin in a few weeks. (*See* Dkt. # 304.) Plaintiff now moves for  
5 reconsideration of the court's order excluding the report and expert testimony based on  
6 this report. (*See generally* Mot.) Plaintiff argues that new evidence eliminates the two  
7 foundational deficiencies identified by the court in its prior ruling. (*Id.*)

### 8 III. ANALYSIS

#### 9 A. Standard

##### 10 1. Motions for Reconsideration

11 Pursuant to the Local Rules of the Western District of Washington, motions for  
12 reconsideration are disfavored, and will ordinarily be denied unless there is a showing of  
13 (a) manifest error in the prior ruling, or (b) new facts or legal authority which could not  
14 have been brought to the attention of the court earlier with reasonable diligence. *See*  
15 Local Rules W.D. Wash. LCR 7(h)(1). A motion for reconsideration must be filed within  
16 fourteen days after the order to which it relates is filed. *Id.* at 7(h)(2).

17 Additionally, under Federal Rule of Civil Procedure 60(b), a court may relieve a  
18 party from an order for the following reasons:

- 19 (1) mistake, inadvertence, surprise, or excusable neglect;
- 20 (2) newly discovered evidence that, with reasonable diligence, could not  
have been discovered in time to move for a new trial under Rule 59(b);
- 21 (3) fraud (whether previously called intrinsic or extrinsic),  
misrepresentation, or misconduct by an opposing party;
- 22 (4) the judgment is void;

- (5) the judgment has been satisfied, released, or discharged; it is based on an earlier judgment that has been reversed or vacated; or applying it prospectively is no longer equitable; or
- (6) any other reason that justifies relief.

Fed. R. Civ. P. 60(b); *see Am. Ironworks & Erectors, Inc. v. N. Am. Const. Corp.*, 248 F.3d 892, 898-99 (9th Cir. 2001) (construing a “motion for reconsideration” filed well past the deadline as a Rule 60(b) motion).

## 2. Expert Testimony

A “trial judge must ensure that any and all scientific testimony or evidence admitted is not only relevant, but reliable.” *Daubert v. Merrell Dow Pharm., Inc.*, 509 U.S. 579, 589 (1993); *see also Estate of Henry Barabin v. Astenjohnson, Inc.*, 740 F.3d 457, 463 (9th Cir. 2014). Reliability requires the court to assess “whether an expert’s testimony has ‘a reliable basis in the knowledge and experience of the relevant discipline.’” *Barabin*, 740 F.2d at 463 (quoting *Kumho Tire Co., Ltd. v. Carmichael*, 526 U.S. 137, 149 (1999) (citation and alterations omitted)). The court is concerned not with the correctness of the expert’s conclusions but the soundness of the methodology. *Id.*

## B. Application

## 1. New Evidence

Inasmuch as Plaintiff's motion was filed well after the Local Rules' deadline for filing motions for reconsideration, it is untimely. (*Compare* Mot. (filed 4/24/14) with 12/4/13 Order.) Plaintiff's motion also fails on the merits.

Plaintiff's first argument is that evidence not previously available demonstrates that the ruling should be reconsidered. Plaintiff identifies five sources of evidence:

- 1        1. Deposition testimony by Foseco's corporate representative that the  
2            experiments involved ash left over from the steelmaking process.
- 3        2. Deposition testimony by Defendant's corporate representative and Defendant's  
4            salesman that the two products were similar.
- 5        3. Deposition testimony by Defendant's expert regarding the temperature of  
6            molten steel during the steelmaking process and the temperatures at which  
7            amosite and crocidolite degrade.
- 8        4. Two studies showing the respective temperatures at which amosite and  
9            crocidolite degrade.
- 10       5. The Supplemental Report and Supplemental Deposition of plaintiff's expert  
11            Dr. Longo explaining that the two products' compositions are substantially  
12            similar.

13       The first two sources are not new evidence: the court specifically considered this  
14       deposition testimony when ruling on the matter the first time, and nonetheless excluded  
15       the report. (See 12/4/13 Order at 2 n. 1, 2; Plf's Bench Br. (Dkt. # 257).)

16       Regarding the remaining sources, both Local Rule LCR 7 and Federal Rule of  
17       Civil Procedure 60(b)(2) require newly discovered evidence that, with reasonable  
18       diligence, could not have been brought to the attention of the court earlier. "Evidence is  
19       not 'newly discovered' under the Federal Rules if it was in the moving party's possession  
20       at the time of trial or could have been discovered with reasonable diligence." *Coastal*  
21       *Transfer Co. v. Toyota Motor Sales, U.S.A.*, 833 F.2d 208, 212 (9th Cir. 1987) (upholding  
22       the denial of a motion for reconsideration because an expert's revised testimony did not  
          constitute newly discovered evidence). Moreover, evidence "is not new when the facts  
          on which it is based had been in the moving party's possession since the start of the  
          litigation." *Rischer v. Banlavoura I, Inc.*, 376 F. App'x 778, 778 (9th Cir. 2010).

1       Here, information regarding the temperature of molten steel during the  
2 steelmaking process was, if not actually in Plaintiff's possession since the start of the  
3 litigation, certainly something which Plaintiff could have discovered with reasonable  
4 diligence. The same goes for the information regarding the respective temperatures at  
5 which crocidolite and amosite degrade. There is no reason for Plaintiff to rely on recent  
6 deposition testimony by Defendant's expert for facts that could easily be otherwise  
7 verified.

8       Similarly, the two studies on which Plaintiff relies to argue that crocidolite  
9 degrades at a lower temperature than amosite were available to Plaintiff at the time of the  
10 first motion: Plaintiff's own experts had relied on one of these studies, and Defendant's  
11 expert had relied on both. (Mot. at 6; *see* Udo Decl. Exs. 10, 11.)

12       Finally, Plaintiff gives no indication that Mr. Longo's supplemental opinion that  
13 Defendant's hot tops are substantially similar to the report's hot tops arises from evidence  
14 that could not have been previously discovered with reasonable diligence. *See Coastal*  
15 *Transfer Co.*, 833 F.2d at 212 (holding that revised expert testimony based on previously  
16 available facts was not newly discovered evidence under the Federal Rules). Mr. Longo  
17 was already aware of the composition of Defendant's hot tops—in fact, Plaintiff relied on  
18 that knowledge when opposing this motion the first time. (*See* Plf's Bench Br. at 5.)  
19 Mr. Longo refers to a Foseco study to determine the composition of the report's hot tops.  
20 (*See* Longo Supp. Decl. (Dkt. # 305); Study (Dkt. # 317-3).) Even if that study was not  
21 in Plaintiff's possession as of the time of the first motion, Plaintiff makes no effort to

1 explain why it could not have discovered this report with reasonable diligence at that  
2 time.

3 Absent new evidence, the event of a mistrial is not an opportunity for the parties to  
4 relitigate deficiencies in their cases identified during the first proceedings. Because  
5 Plaintiff has not raised any newly discovered evidence that could not have been brought  
6 to the court's attention earlier with reasonable diligence, she is not entitled to  
7 reconsideration of the court's order. *See Jasnosz v. J.D. Ott Co., Inc.*, C09-0952JLR,  
8 2011 WL 3563345 at \*3 (W.D. Wash. Aug. 12, 2011) (denying Rule 60(b) motion  
9 because the allegedly newly discovered evidence was available at the time of the trial).

10 **2. Remaining arguments**

11 Plaintiff has not shown that reconsideration of the court's previous order is  
12 warranted under the remaining prongs of either Local Rule LCR 7 or Rule 60(b).  
13 Regarding Local Rule LCR 7, although Plaintiff's arguments address some of the court's  
14 previous concerns regarding the Washbourne Report, they do not establish that this ruling  
15 was "manifest error." *See* Local Rules W.D. Wash. LCR 7(h)(1). In particular, the  
16 parameters of the "laboratory experiments" mentioned in the report remain largely  
17 undefined. (*See* Udo Decl. Ex. 2 at 21.) Absent such information, there is no indication  
18 that the results of those experiments can reliably be extrapolated to bear on the  
19 circumstances at issue in this case. *Cf. Daubert*, 509 U.S. at 589.

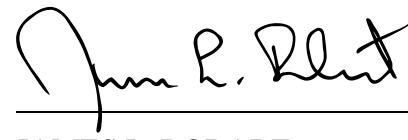

20 Lastly, Plaintiff is not entitled to relief under the catch-all provision of Rule  
21 60(b)(6). This provision allows for relief from judgment for "any other reason that  
22 justifies relief." Fed. R. Civ. P. 60(b)(6). Judgments are rarely set aside under Rule

1 60(b)(6). *See Jasnosz*, WL 3563345 at \*4. This prong is “used sparingly as an equitable  
2 remedy to prevent manifest injustice” and “is to be utilized only where extraordinary  
3 circumstances prevented a party from taking timely action to prevent or correct an  
4 erroneous judgment.” *United States v. Alpine Land & Reservoir Co.*, 984 F.2d 1047,  
5 1049 (9th Cir. 1993). A party who moves for relief under this provision “must  
6 demonstrate both injury and circumstances beyond his control that prevented him from  
7 proceeding with prosecution or defense of the action in a proper fashion.” *Cmtv. Dental*  
8 *Servs. v. Tani*, 282 F.3d 1164, 1168 (9th Cir. 2002). Here, Plaintiff has not raised any  
9 extraordinary circumstances warranting relief under Rule 60(b)(6). (See Mot.)

10 **IV. CONCLUSION**

11 For the foregoing reasons, the court DENIES Plaintiff’s motion for  
12 reconsideration (Dkt. # 315).

13 Dated this 19th day of May, 2014.
